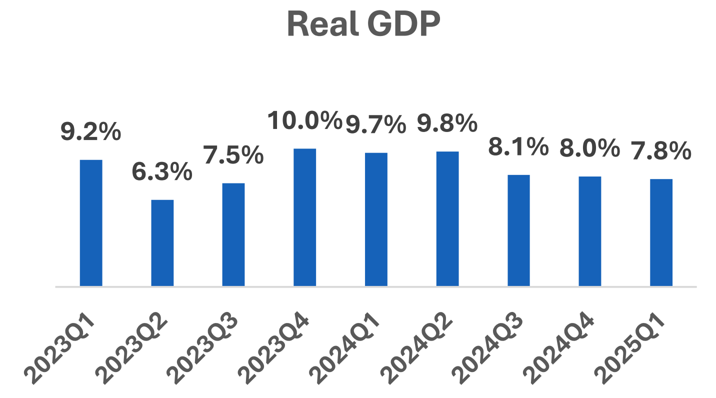
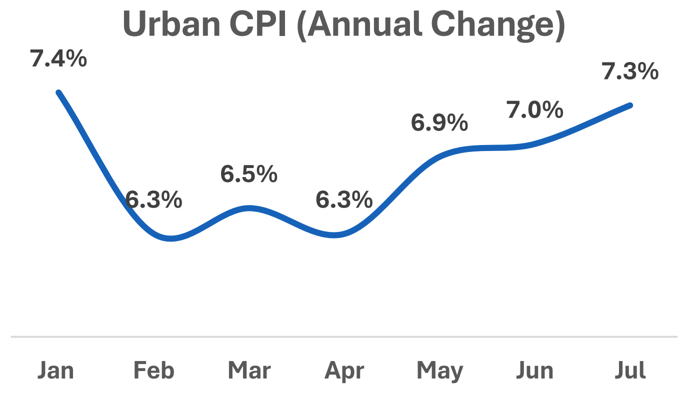
Stable and reaffirmed economic outlook, supporting industry's growth



Rwanda's economy grew by ↑**7.8%** in 2025 Q1, driven by strong performance across all sectors.

- Services led growth at **9%**, supported by retail, ICT, and hospitality. Industry expanded **9%**, with double-digit gains in construction and mining. Agriculture grew moderately **2%** impacted by the decreased food crops production.

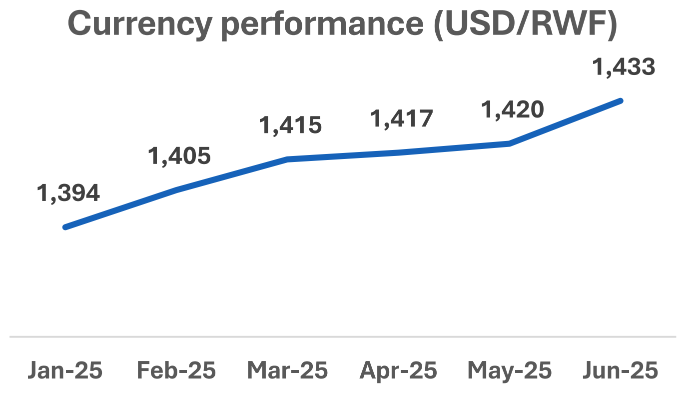
GDP reached Frw 5,255 billion, with services contributing 46%, agriculture 24%, and industry 23%. Domestic demand remained robust, with private consumption accounting for 63% of GDP.



Consumer Price Index(CPI) increased by **7.3% YoY** by Jul-25 albeit lower to the average inflation rate of the year.

2025 Outlook

- Headline inflation projected at **6.5%** due to easing food inflation as domestic agriculture returns to normal levels
- Core inflation expected to increase overall, driven by import costs, impact of geopolitical tensions and adverse weather conditions.



- The Rwandan Franc depreciated by 2.8% YTD against the USD, moving from 1,394 in Jan-25 to 1,433 in Jun-25, showing a more moderate pace compared to the 9.4% depreciation in 2024 and 18.1% in 2023. This reflects improved external inflows and a relatively stable macro backdrop, though FX pressures remain linked to a high import bill.
- Regionally, the Rwandan Franc gained 2.8% vs. the Kenyan Shilling (KES) and 5.4% vs. the Ugandan Shilling (UGX) in H1 2025, reflecting relative resilience
