Profit for the period			11,998	11,998
At end of Period	40,196	278,402	53,850	372,448

The above are extracts from the Company's unaudited financial statements for the 6 months ended 30 September 2014.

Performance

During the first 6 months of the year, the Company made a profit after tax of Ksh 11.998 million compared to a loss of Ksh 58.22 million during the same period prior year. This result includes a gain on the fair value movement of the biological assets of Ksh 22.58 million compared to a loss of Ksh 39.43 million in the previous similar period. The improved performance is a result of improved coffee prices that have translated to increased revenues of Ksh 42 million compared to Ksh 25.426 million for same period prior year. Management's stringent cost control measures, without compromising production and quality are also bearing fruit as reflected in the reduction in cost of production to Ksh45.8 million from Ksh56 million during same period last year.

Outlook

The directors are of the view that the prevailing coffee price trend will be maintained in the next half of the financial year, during which time we shall offer the bulk of our coffee for sale. With the current cost control measures, sustained yields and improved international coffee prices, we anticipate to post better full year financial results.

Dividend

The directors do not recommend payment of an interim dividend

By order of the Board

Lucas Omariba
CHAIRMAN
20 November 2014
