Cash and cash equivalents at the beginning of the year	14,545	8,562
Cash and cash equivalents at 30 September	34,590	9,746

RESULTS SUMMARY

The above are extracts of the un-audited financial statements of Eaagads Limited that were approved by the Board of directors on 28 November 2024.

PERFORMANCE

During the six-month period under review, the company produced 134 tons of clean coffee, a 29% decrease from the 188 tons produced during the same period last year. This decline was primarily attributed to unfavorable weather conditions, which disrupted the flowering of the 2024 early crop. Despite these production challenges, the company achieved a sales volume of 166 tons, generating higher sales revenue. This was a marked improvement compared to the prior year, when sales were constrained due to the absence of a grower-miller license. Production costs increased during the reporting period, consistent with the volumes produced.

OUTLOOK

This period, we experienced excessive long rains that resulted in extreme flooding. This caused loss of coffee trees and also provided conducive conditions for Coffee Berry Disease (CBD) as even sprays were difficult. As a result, we have revised the total crop for the year 2024/25 to 300tons. On the other hand, we expect the late crop to be very good quality due to the adequate water. The weather forecasts predict insufficient short rains (Oct to Dec 2024). The company continues to maintain control over both production and marketing processes, and to capitalize on opportunities for increased revenue, enhanced quality assurance, and greater adaptability to market demands.

DIVIDEND

The board of directors do not recommend payment of an interim dividend for the period ended 30 September 2024 (30 September 2023: Nil)

By the Order of the Board

Company Secretary
28 November 2024
