Operating environment

Tailwinds

- ✓ Strong domestic activity, employment gains, and investment-led demand.
- ✓ Stable and accommodative monetary policy contributed to a more stable repayment environment, improving the Bank's NPL.
- ✓ Ongoing strong government investment in infrastructure and fiscal support, contributing to long-term growth momentum.

Headwinds

- ✗ Headline inflation rose to 7% in Q2, driven by increased core inflation (hotels & restaurants) and fresh food inflation. This uptick particularly in key categories adds inflationary pressure.
- ✗ The trade deficit widened by 10.8% in Q1, reflecting import growth outpacing exports. The Rwandan franc depreciated (~2.3% vs USD), adding strain to external balances.
- ✗ Weaker external demand led to less stimulus for Rwanda's export sectors.
