COMMENT ON RESULTS									OPERATING ACTIVITIES			
The results for the half-year ended 31st March 2009 show a profit after tax from operating activities of Shs.78.89m compared to a loss after tax of Shs. 20.47m for the same period in the previous year. The return to profitability is mainly due to increased revenues from improved production of the tea and coffee divisions as production levels in the previous year were severely impacted by the post election crisis and adverse weather conditions.									Cash Flow Generated from Operations	65,546	92,284	
International tea prices have been stronger than the same period last year which together with a continuing favourable exchange rate have positively impacted the bottom line. However, the rising cost of labour and ongoing high costs of inputs such as fertilizer and energy, particularly electricity, continue to erode profitability.									Tax Paid	(32,368)	(6,033)	
The Group's diversification into value added activities has begun to bear fruit with the coffee mill, "Savanna" coffee lounges, and export operations all making positive contributions. However high tea prices continue to impact negatively on the performance of value added retail products.									Net cash flows (used in) generated from operating activities		33,178	86,251
Finance costs in the previous period included the issue costs relating to the Shs.600m loan notes and the costs for the current year reflect the interest on those notes for the period.									INVESTING ACTIVITIES			
Net gains from changes in biological assets was Shs.76.78m for the six month period. Whilst these gains increase the profit attributable to the members they are not realised gains and are unavailable for distribution and so have been credited to the biological assets fair value reserves.									Purchase of Property, plant and equipment	(28,258)	(287,460)	
INTERIM DIVIDEND									Purchase of Leasehold land and buildings	-	(8,000)
