Macroeconomic and Operating Environment

Global Economic Outlook

Slowing growth

- **Global economic slowdown.** Global growth is projected to slow to 2.4% in 2023, from 3.4% in 2022. This will be led by advanced economies. However, emerging economies' growth will strengthen in 2023 to 4.2%, from 3.6% in 2022, in large part due to China lifting its zero-Covid policy.
- **The slowdown is in large part due to the sharp tightening of monetary policy** in 2022, led by the world's major central banks. The war in Ukraine will also dampen economic activity, particularly in Europe. China's re-opening implies a brisker growth recovery for that economy than initially expected.
- **The risks to the growth outlook are to the downside.** The turmoil in the banking sector could result in a sharp slowdown in lending, which would slow growth. The war in Ukraine could escalate. On the upside, a tight labour market and strong wage growth in the US is supportive of consumer demand.
- **Global growth is projected to pick up to 2.9% and 3.3% in 2024 and 2025, respectively.** This is expected to be led by the advanced economies.

Real GDP growth, %

Source: Bloomberg

Global Economic Outlook (continued)

Inflation has peaked, but above pre-pandemic levels

- **Some moderation in inflation.** Inflation may have peaked but we are yet to see a sustained slowdown to pre-pandemic levels. Global inflation is expected to slow to 5.3% in 2023, from 8.8% in 2022, led by advanced economies. This on the back of a decrease in commodity prices, and the effect of the tightening of monetary policy. Notably, inflation in the US, UK and EU remained strong in February, at 6.0%, 10.4% and 8.5%, respectively.
- Global inflation is expected to fall further in 2024 to 3.6%, but this will still be above pre-pandemic levels.
- **Emerging economies inflation is expected to pick up** to 5.9% in 2023, on the back of stronger demand from China.
- **EMEA countries inflation is expected to fall** to 14.4% in 2023, but remain in the double digits. It is projected to fall into the single digits – to 9.4% – in 2024.

Source: Bloomberg

Regional Economic Outlook

Pick up in GDP growth, stubborn inflation

GDP growth

Source: IMF

Growth projected to pick up over the medium term. Sub-Saharan Africa (SSA) is expected to grow by 3.8% in 2023, by the IMF, as it did in 2022. East Africa will grow faster than SSA, with mid-single-digit growth rates. Kenya's growth is projected to moderate to 5.1% in 2023, from 5.3% in 2022, in part due to the dampening effect of high interest rates on credit growth, and fiscal consolidation which will slow public investment. The DRC will grow by a strong 8.0% in 2023, from 8.5% in 2022. East Africa's growth is projected to increase across East Africa in 2024.

Inflation rates, YE

Source: IMF

Stubborn inflation. Inflation is generally expected to slow in East Africa in 2023. However, there are upside risks from strong food prices owing to an ongoing drought in the region, and currency depreciation against a strong US dollar. In Kenya, we expect inflation to remain in the high single-digits in 2023, and slow to the upper band of its target range of 2.5-7.5% in the short term.

Regional Economic Outlook (continued)

Regional currencies weaken against a strong US dollar

Regional CBR

Interest rates are likely to remain elevated. As we believe there is upside risk to inflation, we expect interest rates to remain high. The US Federal Reserve has also indicated it has not finished hiking its interest rate. This implies upside risk to interest rates in the region. We think interest rate cuts are a low-risk event in 2023. This is only likely from 2024. In Kenya's case, we think there is upside risk to the central bank rate (CBR) over the short term.

Regional currency depreciation to USD

Strong US dollar puts currencies under pressure. The sharp increase in US interest rates led to a risk off sentiment that placed frontier markets' currencies under pressure to depreciate. In Kenya, we expect this pressure to persist in the short term because of significant short term dollar financing needs.

Global Economic Outlook

Turmoil in the banking sector

On 10 March, Silicon Valley Bank (SVB) failed: - SVB's deposits tripled to \$189bn, from 4Q19 to the end of 2021. Some of these funds were invested in long-dated fixed-rate bonds. Interest increases led to an unrealised loss of c. \$16bn in SVB's bond portfolio, greater than its equity base. A fall in deposits compelled the bank to sell its bond portfolio, crystallising the loss. This spooked clients and triggered a bank run.

On 12 March, New York-based Signature Bank became the next casualty of turmoil in the US banking sector. This after customers withdrew 20% of its deposits.

On 14 March, Moody's downgraded its outlook for US banks to negative, from stable, and placed six large regional banks on review for downgrade.

On 15 March, Credit Suisse's biggest shareholder, Saudi National Bank, refused to inject more capital into the Swiss bank. Credit Suisse's share price dropped by 24%.

On 16 March, 11 Wall Street banks deposited \$30bn into First Republic, to shore the bank up amid fears of customer flight.

On 19 March, Credit Suisse was acquired by UBS, for \$3.25bn. The Swiss authorities engineered this fast-track takeover to prevent the failure of Credit Suisse. A \$54bn liquidity backstop provided by the Swiss National Bank on 15 March failed to halt a crisis of confidence in Credit Suisse.

NASDAQ Banks Index

Source: Bloomberg

Global Economic Outlook (continued)

Inflation vs financial stability

- The world's major central banks have opted to continue with interest rate hikes to tackle inflation, despite the turmoil in the banking sector.
- **European Central Bank (ECB) was the world's first central bank to make a policy decision, on 16 March, following SVB's failure.** The ECB elected to increase its policy rate by 0.5ppt on 16 March. It insisted there was no 'trade-off' between tackling inflation and ensuring financial stability.
- **The Federal Reserve hiked its policy rate by 25bpts on 22 March,** to a new target range of 4.75-5.00%. However, the Fed dropped language of 'ongoing increases' in its statement, to 'some additional' increases as it observes the turmoil in the banking sector. The market took this to mean that the rate hiking cycle will end soon. Most officials expect the policy rate to peak at 5.0.-5.25% this year and remain at this level until 2024. Rate cuts are projected from the end of 2024.
- **The Bank of England increased its policy rate by 25bpts to 4.25% on 23 March.** With February's inflation surprising on the upside at 10.4%, this decision was expected.

Financial crises that have triggered a pivot in interest rate policy

Overview of the “Africa Recovery and Resilience Plan”

The Plan

The Africa Recovery and Resilience Plan is aimed at catalysing a demand complementarity-led transformation of Africa, underpinned by: (i) capacitating and enhancing productivity of raw material producers, (ii) integrating primary producers to more co-ordinated African productive / manufacturing capacities; and (iii) connecting these primary and secondary sectors to global supply chains (and capital markets) that are now more focused on reducing concentration risks with increased focused on assurance of accessibility.

Equity Group's execution of the “Africa Recovery and Resilience Plan” will be underpinned by its **Social and Economic Engines** that capacities value chains (Social Engine) and provide holistic financial solutions to productive ecosystems (Economic Engine).

Equity Group's excess liquidity (currently ~2% of cumulative GDP of east and central Africa) will be redirected to the private sector across various value chains.

6 Pillars of the Plan

The Plan comprises 6 strategic pillars that ensure a systematic, co-ordinated and holistic framework for execution:

- **A more coherent and productive natural resource ecosystem in agriculture and extractives** - more co-ordinated, connected and capacitated primary supply chains will drive higher productivity and throughput
- **Manufacturing and logistic anchors** - Africa has an opportunity to leverage off its natural endowments to anchor expansion of productive capacities and manufacturing capacity. More importantly, a coherent primary sector which is integrated to pan-African productive capacities will drive demand complementarities across regional blocs over the medium- to long-term
- **Trade and investment to give broader market access and support factor mobility** - expanded markets and access to technology, capital and skills will enhance offtake of African products and services
- **MSMEs** - connectivity of small businesses into formal primary and secondary sector value chains will enrich and drive more integrated domestic value chains / demand complementarities
- **Social and environmental transformation** - capacity building of value chain stakeholders, especially amongst smallholder farmers and MSMEs will drive sustainable productivity gains and improve ease of factor mobility
- **Technology-enabled economy** - online businesses will accelerate connectivity and velocity in ecosystems

Objectives of the Plan

The first phase (end-2025) objectives of the plan include:

1. **Inclusivity of 100 million on-line businesses and customers:** Economic and social inclusion of more productive households and financially enabled value chains
2. **Multiplier effect of 5 million borrowing businesses and 25 million borrowing consumers:** borrowing businesses to drive value chain expansion and employment, whilst consumer borrowing to enable household aspirations and livelihoods
3. **Employment of 50 million:** 25 million direct jobs to be created as businesses grow and a further 25 million indirect jobs created as value chains expand and deepen
4. **Additional private sector lending of ~2% of regional GDP:** loan book to be directed towards agriculture (30%), manufacturing (15%), MSMEs (65%)

2025 Strategy Framework

Equity Group's 2025 strategy is a multi-pronged and holistic solution to achieve social and economic transformation of Africa. The strategy comprises 6 strategic pillars that will be operationalized through a collaborative, deliberate and ecosystem centric approach. The plan was conceived with execution in mind and with no economic and financial assumptions, only targets!

Global Ratings and Accolades

Equity Group's MD and CEO, Dr. James Mwangi, was honoured in the 2019 Bloomberg 50 list. This is an honorary list of fifty innovators, entrepreneurs, and leaders who have impacted the global business landscape in measurable ways. Dr. Mwangi was lauded for his contribution in steering Equity Bank to have presence in the greater Central and Southern Africa region. He was honored alongside environmental activist Greta Thunberg, New Zealand Prime Minister Jacinda Ardern, CNN President and Warner Media Chairman Jeff Zucker, Singer and entrepreneur Rihanna, among others.

Global Ratings and Accolades

Dr. James Mwangi honouree, 2020 Oslo Business for Peace Award

Honourees are chosen by a prestigious Award committee consisting of past Nobel Prize winners in Peace Economics.

"Dr. James Mwangi receives the Award for his businessworthy values in championing financial inclusion for all in East and Central Africa. Dr. Mwangi helped achieve a social revolution by bringing banking services to people who previously had limited access to them bolstering Kenya's GDP. Dr. Mwangi is an exceptional entrepreneur and humanitarian. The committee sees him as a shining example of how business leaders can accelerate change and help solve the world's problems," said Per Saxegaard, Founder of the Oslo Business for Peace Awards.

The Africa Recovery & Resilience Plan

Commonwealth Heads of Government Meeting

As part of continuous efforts to champion post COVID-19 recovery, Equity Group participated in 3 high-level engagements, where the Group's Africa Recovery and Resilience Plan was officially launched and partnership agreements signed to accelerate the implementation of the plan which Equity Group has seeded with a USD 6 billion fund. The three key engagement included the:

- Commonwealth Heads of Government Meeting (CHOGM) in Kigali Rwanda
- Launch of the Africa Continental Free Trade Area (AfCFTA) partnership agreement and
- Launch of the East African Community (EAC) partnership agreement

Dr. James Mwangi, Equity Group Managing Director & CEO addressed delegates from 54 countries at the 2022 Commonwealth Business Forum in Kigali on Equity Group's Kshs 700 billion Africa Recovery and Resilience Plan as the anchor partner to the Commonwealth meetings.

A photograph of construction workers on a site. In the foreground, two men wearing white hard hats are shaking hands and smiling. The man on the left is wearing a white shirt and a yellow safety vest, while the man on the right is wearing a grey work shirt. In the background, several other workers in hard hats are visible, slightly out of focus. The image is overlaid with several white, pill-shaped labels containing the word 'MEMBER' in a sans-serif font. One large label is at the top center, another is to the left of the two men, and several smaller ones are scattered to the right and bottom left.

Macroeconomic Environment Indicators & Trends

Macroeconomic Environment - Kenya

Real GDP growth, %

KES/USD

- Resilient growth** – Growth was robust in 2022 despite a challenging external environment, a protracted drought and elections. Following an uneventful election, we expect growth to have picked up in 4Q22 and estimate the economy grew by 5.3% in 2022, faster than the SSA average of 3.8%.

- Kenya shilling weakness** – The Kenya shilling weakened in 2022 on the back of 1) a strengthening US dollar; 2) a strong oil price that contributed to the widening of the current account; and 3) financing shortfalls for the budget. The fall in FX reserves to \$7.44bn (4.2 months of import cover) at end-2022, from \$8.82bn (5.4 months) a year earlier reflects the deterioration of the country's external position.

Source; IMF, Central Bank of Kenya,

Macroeconomic Environment - Kenya (continued)

Interbank rates, %

- **Interbank Rates** – There has been decreased liquidity in the market pushing overnight lending rates up.

T-Bill rates — 91 Day — 182 Day — 364 Day

- **T-Bill Rates** – Rates have been gradually rising in the short-term with the long-term end of the curve remaining relatively stable.

Source; Central Bank of Kenya

Macroeconomic Environment - Kenya (continued)

Inflation, % YoY

- Sticky inflation** – Inflation increased to 9.2% YoY in February, following a short-lived slowdown in November to January. This largely due to an increase in food inflation to 13.3% YoY, from 12.8% in January. Inflation is past its 2022 peak of 9.6% in October, however it remains sticky in the 9.0-9.5% region, in part due to strong food prices. The depreciating shilling is also likely placing upward pressure on imported prices.

Foreign exchange reserves

- FX Reserves** – Usable foreign exchange reserves fell in 2022. They decreased to \$7,439 million or 4.17 months of import cover on 29 December, from 4.19 months on 29 September 2022.

Regional currencies depreciation against USD

*Regional currencies marginally affected by the US dollar exchange.

**USD/SSP rates are as per Bank of South Sudan(BOSS)

Regional Outlook

Uganda

- As the economy was recovering from the COVID-19 pandemic, it experienced an outbreak of Ebola in 2022, which brought about public health concerns that threatened to undermine economic activity. Inflation also came under upward pressure from higher food, fuel and fertiliser prices. Monetary policy was tightened to contain inflation. Growth is projected to pick up to 5.6% in 2023, by the IMF, from 5.0% in 2022. Inflation is expected to fall to 7.8% at year end, from 10.2%. We expect monetary policy to remain firm in 2023. The risks to the outlook include higher imported inflation, a slowdown in external demand, climate change and another health crisis.

Tanzania

- The economy's recovery from the pandemic is expected to continue in 2023, when the IMF forecasts stronger growth of 5.2%, up from an estimated 4.7% in 2022. This is in part due to an improvement in the business environment. However, strong price pressures from fuel, food and fertiliser are expected to keep inflation elevated. Inflation is expected to increase to 5.3% in mid-2023, from 4.8% at the end of 2022. So, we expect monetary policy to remain firm over the short term. The current account deficit is projected to remain relatively wide at 4-5% of GDP in 2023 in part due to weaker global demand. A weaker external position may put the currency at risk of depreciating.

Source: World Bank, IMF & Focus Economics.

Regional Outlook (continued)

Rwanda

- Rwanda's economic growth is projected to slow to 6.2% in 2023, from 6.8% in 2022, by IMF estimates. This is due to a weaker global economy, supply side constraints related to the Ukraine war and strong commodity prices. Growth is expected to pick up to 7.5% in 2024 on the back of infrastructure investment that is supportive of a pickup in the services sector. Inflation is expected to fall back into the single digits in 2023, on the back of further monetary tightening. Rwanda's twin deficits will remain wide. The budget deficit may come under pressure from higher security expenditure. The Rwandan franc may come under pressure from a wider current account deficit.

DR Congo

- The DRC is expected to maintain strong growth of around 8% in 2023, due to robust mining production. However, there are downside risks to the outlook including the armed conflict in the eastern part of the country, and elections at year end. Inflation is expected to moderate to 9.8% at end-2023, by the IMF, from 13.1% at end-2022 owing to softer commodity prices. Foreign exchange reserves improved more than expected to US\$4.6 billion in 2022, which is supportive of the currency. The budget deficit is expected to come under pressure from arrears repayment, election-related spending and increase security expenditure. That said, public debt remains low at 22% of GDP.

Source: World Bank, IMF & Focus Economics.

Regional Outlook (continued)

South Sudan

- Since the emergence of the COVID-19 pandemic in 2020, South Sudan has had to deal with concurrent economic shocks, including flooding and the war in Ukraine. This aggravated an already challenging economic situation. The increase in the oil price in 2022 helped counter the effect of lower oil production and helped sustain foreign exchange reserves. An economic recovery is expected in 2023. The economy is projected to grow by 2.1%, following a 1.7% decline in 2022. Inflation slowed in 2022 to 8.7%, according to an IMF estimate, in part due to the restoration of fiscal restraint and the curbing of monetary financing. Inflation is expected to increase to 13.7% in 2023; we believe this is in part due to tight food supply. A current account surplus is predicted by the IMF over the medium-term implying some easing of the depreciation pressure on the currency.

Equity Group regional presence to drive cross-border trade and support informal traders

Geographical Expansion and Business Diversification

DRC significant resource endowment

- On 11th July 2022, DRC became an official member of East African Community (EAC) by depositing instruments of ratification on the accession of the EAC Treaty with the secretariat. This expanded trade and investment opportunities in the region
- The admission of DRC to the EAC has seen concerted efforts from member states to restore peace to the troubled region of eastern Congo. Member states have sent in soldiers to the region on peace keeping mission. An Inter-Congolese peace talks involving armed groups in eastern DRC, local community leaders, civil society and other relevant stakeholders, with the aim of finding sustainable solutions to the security situation has been initiated
- DRC also has huge copper and cobalt reserves. Copper and cobalt demand will be accelerated by increased usage of electric vehicles and charging stations (5x more than gas car), renewable energy and storage systems, 5G base stations. Kamoa-Kakula copper mine expansion and the increasing global demand for Copper should continue to spur economic growth
- DRC has the largest reserves of Coltan/tantalite (estimated at 60-80% of global reserves). Coltan is used in many electronic devices including mobile phones
- DRC has a large young population, ~93 million, with 45% of the population in urban centres presenting consumption opportunities

Geographical Expansion and Business Diversification

Landmark Oil Pipeline deal signed by Uganda and Tanzania

- Tripartite East African Crude Oil Pipeline project agreement (EACOP) signed off on 11th April 2021 between Uganda, Tanzania and large oil companies
- On 9th December 2021, Uganda Parliament passed the East African Crude Oil Pipeline (EACOP, Special provisions) Bill into Act of Parliament to domesticate the treaty between Uganda and Tanzania before the EACOP Company can embark on the pipeline construction
- On 1st February 2022, TotalEnergies, China National Offshore Oil Corporation (CNOOC) and the Uganda National Oil Company finalized the terms for Oil drilling and pipeline construction
- On 4th July 2022, a request for a license to begin the construction of the East African Crude Oil Pipeline (EACOP) was submitted to the government of Uganda by the company in charge of the project, East African Crude Oil Pipeline Company (EACOP) Ltd
- On 4th July 2022, the project was reported to be at land acquisition stage which is expected to be completed in mid-2023
- The deal paves way for:
 - US\$ 15Bn investment (c.40% of Uganda GDP)
 - Construction of 1,440km (US\$ 3.55bn) electrically heated crude oil pipeline from Ugandan Albertine region to Tanzanian seaport of Tanga
 - Creation of c.10,000 plus jobs
 - Possible peak production of 230,000 barrels per day

Geographical Expansion and Business Diversification

Promising Tanzania Operating Environment

- On 20th May 2021 Tanzania signed the host country EACOP agreement with TotalEnergies and the Ugandan government for the construction of a US\$ 3.55 billion oil pipeline which will see Tanzania earn US\$ 12.7 for each barrel transported. The Final Investment Decision was signed between TotalEnergies and its partners on 1st February 2022
- The admission of Democratic Republic of Congo (DRC) to the East African Community presents a huge opportunity to Tanzania due to its proximity to DRC and its reliance on neighboring countries for agricultural resources. DRC has approximately 93 million population and is rich in natural resources
- On 10th October 2022, the Tanzanian and Kenyan presidents directed line ministries to remove the remaining non-tariff barriers (NTBs) that were undermining trade and investment between the two countries. The heads of state also committed to fast-track construction of Gas Pipeline Project from Dar es Salaam and Mombasa
- Tanzania FY 2022/2023 budget proposes tax measures that support local and foreign direct investment which include:
 - Digital services - Introduction of Digital Service Tax of 2% for non-resident service providers and improving the VAT registration process for non-resident suppliers of electronic services;
 - reduction of money transfer levy, albeit widening its tax base to cover all electronic transactions;
 - waiver of income tax and granting of VAT exemption for Special Strategic Investors under the Tanzania Investment Act;
 - recognising alternative financing arrangements such as Islamic Banking products for Income Tax and Value Added Tax purposes;
 - reduction of Workers Compensation Fund (WCF) from 0.6% to 0.5% for the private sector;
