COMMENTS ON THE RESULTS

The results for the half-year ended 31st March 2013 show a profit after tax from operating activities of KShs. 170 million compared to KShs. 160 million for the same period in the previous year. The increase in the profits is largely as a result of higher production and sales volume for tea and coffee and also improved tea prices in the period under review. This was made possible by improved rainfall patterns. The results were however negatively impacted by significantly lower coffee prices and the effects of a stronger Kenya shilling.

The Company continued to experience increased costs of production in relation to labour, power and agricultural inputs resulting in eroded margins. In particular, frequent power outages, which were as high as 12%, have necessitated the increased use of expensive diesel generators to generate power. In order to mitigate these negative impacts, the company has continued to implement efficiency

measures in its factories and farm level operations.

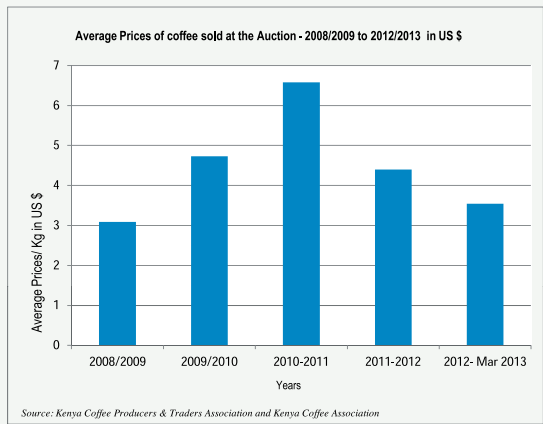

The gains from changes in the valuation of biological assets is kshs 50 million for the six month period driven mainly by the increased production and higher realisation of tea. This valuation gain however does not contribute to profits available for distribution.

INTERIM DIVIDEND

The Board has declared the payment of a 25% interim dividend (Kshs 0.25 per share), payable less withholding tax, where applicable, on or about 26th July 2013 to the members on the register at the close of business on 17th June, 2013. The Company's register of members will be closed for one day on 18th June, 2013
