COMMENTS ON THE RESULTS (UNAUDITED) FOR THE SIX MONTHS PERIOD ENDED 31ST MARCH 2025

The Group's business performance was softer than expected but with signs of recovery during the second half of the year. The softer performance is attributable to the higher cost of production, unpredictable weather patterns leading to lower production volumes, lower sales volumes and depressed price realizations, especially for tea. The continued geopolitical tensions and continued closure of the Suez Canal have significantly disrupted the smooth flow of goods to the target markets while shipping charges have increased considerably, impacting on the cost of doing business.

Consequently, the financial performance of the units was adversely affected, except for the coffee division that was profitable. The tea, avocado, and macadamia divisions were severely affected and performed below expectation. During the period, our coffee estates fetched strong prices and, equally, the coffee trading unit continues to trade strongly and help meet the annual projected profitability.

The macadamia nuts and avocado fruits seasons kicked off in March 2025, and are expected to contribute to profitability in the second half of the year.

As a result, the turnover decreased marginally by 1.1% to Kes. 2.96 billion from Kes. 2.99 billion in the previous period. The cost of sales also increased marginally by 0.95% to Kes. 2.39 billion from Kes. 2.37 billion in the previous period.

Overall, The Group attained a loss after tax and non-controlling interest (including the changes in the fair value of biological assets) of Kes. 113.1 million (prior year, same period loss Kes.37.7 million).

This comprises of operating loss Kes. 85.3 million, minority interest loss of Kes. 2.2 million, and Kes. 25.6 million losses from changes in the fair value of biological assets. Prior year same period loss from operating activities was Kes. 43.9 million, minority interest loss 1.6 million and gains from changes in the fair value of biological assets of Kes 7.8 million.

Nonetheless, the Group continues to maintain a strong liquidity position for the business operations, including short-term investments. The period closed with a cash and demand deposits balance of Kes. 736.4 million and long-term infrastructure bonds of Kes 168.5 million.

Our liquidity position is therefore stable and firm and is well poised to support the company in driving forward and achieving profitable growth. We, however, continue to focus on making prudent business decisions to mitigate these negative effects and aim to continue delivering the desired results in the future.

OUTLOOK

The market and economic situation though challenging, both at the domestic and international levels, looks promising. A recovery in tea prices, a resumption in avocado and macadamia nuts shipments, and an increase in coffee trading volumes will strengthen performance in the second half.

DIVIDEND

In view of the results, the Directors do not recommend the payment of a dividend.
