Results for the six months ended 31st January 2023

The Board of Directors of Carbacid Investments plc is pleased to announce the unaudited half year results for the six months ended 31st January 2023.

Turnover for the first 6 months of the year increased by 22% over the same period last year. Current growth is attributed to regional economic recovery and new markets for liquid carbon dioxide coupled with increased operating efficiency. However cost increases have also been experienced in various inputs - fuel, power , spares - and this has meant a lower flow through to the operating profit. This has resulted in operating profit increasing by 15% compared to the same period last year.

Profit after tax increased by 14% compared to the same period last year and earnings per share increased from Kes 1.42 for the 6 months to January 2022 to Kes 1.62 in January 2023.

Global disruptions, inflationary pressures, weakening currency, increasing costs of operations will be major challenges for the rest of the financial year. The US dollar shortages in most regional markets is also impacting on demand and that is a new challenge that the business is adjusting to. The Board continues to look at options to maintain the business levels in this volatile environment.

Dividend

As has been the practice in recent years a final dividend will be considered based on full year results.

By Order of the Board,
Conrad Nyukuri,
Secretary,
3 March 2023
