Key Insights

Core Income Growth

Net interest income expanded **15.2% YoY** to RWF 57.8bn, driven by active liability management reducing the cost of funds to 2.4% from 3.1% a year earlier.

Non-Funded Income

Net non-interest income grew **8.8%** to RWF 14.5bn. Fee income reversed compression, rising **26.7%** to RWF 9.5bn, while FX income declined 34.8%.

Operating Costs & Efficiency

Operating costs rose **22.6%** to RWF 26.4bn (CIR 36.6%), largely due to administration expenses (+54.2%) for platform investments. Personnel costs grew a contained 3.7%.

Credit Provisions

Net impairment on loans reached RWF 6.9bn (**+8.2% YoY**). Recoveries moderated to RWF 0.2bn from RWF 1.2bn, requiring continued provisioning vigilance.

Loan Book Movement

Net loans **+7.3% YoY** but -1.6% YTD reflecting normal seasonal patterns in corporate disbursements and active portfolio management.

Liquidity Strengthening

Cash with banks **doubled YoY** to RWF 689.9bn. Liquid assets represent 40.6% of total assets (up from 39.1% at year-end 2025).

Stable Deposit Base

Client deposits grew **11.7% YoY** (stable YTD at -0.4%), confirming retention strength. Core deposits represent 72.4% of total assets.

Capital Position

CAR strengthened to **23.4%** from 21.7% a year earlier, providing 880 bps headroom above regulatory minimum for growth.

Key Performance Metrics

Performance metrics comparison against Q1 2025 and Q4 2025 reflecting profitability moderation and stable asset quality.

Key Insights

Profitability & Efficiency: Return on average equity of 20.9% and return on average assets of 3.7% reflect moderation from Q1 2025, driven by operating cost growth of 22.6% — concentrated in administration and general expenses — and an income tax charge that grew 15.9% against net income growth of 6.9%. Pre-provision operating profit grew 9.3% YoY. The CIR of 36.6% improved materially from Q4 2025 (41.6%), confirming the Q4 cost spike was substantially seasonal. Personnel costs grew a contained 3.7%.

Net Interest Margin: NIM of 8.8% compares with 9.0% in Q1 2025 and 10.1% in Q4 2025. The sequential compression from Q4 reflects seasonal balance sheet positioning effects and early CBR tightening pass-through. The cost of funds declined to 2.4% from 3.1% a year earlier, providing a meaningful offset. The loan yield held at 15.0%, broadly stable against the prior year.

Asset Quality: The NPL ratio rose to 4.8% at 31 March 2026, reflecting credit normalisation across select segments. The annualised cost of risk of 1.56% compares with 1.0% at year-end 2025 and 1.6% in Q1 2025. NPL coverage on a net exposure basis stands at 98.0%. Management is applying the IFRS 9 provisioning framework and monitoring the portfolio trajectory against the backdrop of rising inflation and monetary tightening.

Key Macroeconomic Insights

Rwanda's Growth Trajectory

Rwanda's economy expanded **9.4% in 2025**, among the strongest performances in Sub-Saharan Africa, driven by industry (+11%), Agriculture (+7%) and services (+9%). The IMF World Economic Outlook (April 2026) projects continued expansion of **6.8% in 2026** — albeit moderate due to inflationary headwinds driven mainly by the ongoing War in the Middle East.

Inflation Uptick

Urban CPI rose sharply from 8.0% at year-end 2025 to **13.0% in April 2026**, breaching the regulator's upper bound of 8% by a significant margin. This acceleration reflects elevated energy/fuel prices, food price pressures, and external cost-push factors. The pace and magnitude of the April CPI reading warrants close monitoring in Q2 2026 as it impacts consumer purchasing power.

Monetary Policy — Active Tightening

The regulator raised the Central Bank Rate to **8.25% in May 2026**, following an earlier increase to 7.25% in Feb 2026 — a cumulative tightening of 150bps since Q3 2025. This aggressive cycle signals commitment to restoring price stability and anchoring inflation expectations, but introduces near-term headwinds for credit demand and funding costs across the banking sector.

Key Insights

Premium Growth — Broad-Based

GWP grew 22.3% to RWF 4.30bn, with growth across all classes except liability. Fire (+51.3%), Engineering (+27.9%), and Motor (+24.0%) were primary drivers. The portfolio continues to diversify: fire and agriculture now represent 34% of the book.

Underwriting Performance — Sharply Improved

Net underwriting profit grew 143% to RWF 0.86bn driven by premium growth, a normalising claims environment (claims ratio improving to 41% from 57%), and active reinsurance optimisation. Net claims declined 11% to RWF 1.45bn despite higher premiums.

Profitability — Sustained

Net profit of RWF 1.15bn grew 58.3% YoY. BK GI remains the most profitable insurer in Rwanda, with the fourth-largest market share by GWP. Investment income grew 14% to RWF 0.68bn, constrained by elevated receivables of RWF 7.0bn.
