Equity Group's Philosophies

Our Purpose:

Transforming lives, giving dignity and expanding opportunities for wealth creation.

Our Vision:

To be the champion of the socio-economic prosperity of the people of Africa.

Our Mission:

We offer integrated financial services that socially and economically empower consumers, businesses and communities.

Positioning Statement:

We provide inclusive financial services that transform livelihoods, give dignity and expand opportunities.

Our Inspiration:

That when years turn our vision dim and gray, we shall still see beauty in the tired wrinkles of our faces and shall take comfort out of the fact and knowledge that when we were given the opportunity, we did all we could to empower our people to exploit opportunities and realize their full potential on the road to economic prosperity.

Our Core Values:

Integrity

Teamwork

Respect and Dignity
for the Customer

Professionalism

Creativity & Innovation

Press Release

Press Release

EQUITY GROUP RECORDS HISTORIC RESULTS REPORTING A 55% GROWTH IN PROFIT AFTER TAX OF KSHS 75.5 BILLION, UNDERSCORING THE SUCCESS OF ITS STRATEGIC TRANSFORMATION.

- *Proposed dividend payout of Kshs 21.7 billion translating to Kshs 5.75 per share representing a 35.3% growth in dividends (2024: Kshs 16 billion, Kshs 4.25 per share).*
- *Equity Bank Kenya profit after tax rose by 63% to KSh39.2 billion (FY2024: KSh24.1 billion). Regional banking subsidiaries registered 53% growth in profit after tax of Kshs. 36.3 billion driven by profit after tax growth of 58%, 500% and 125% for DRC, Uganda, and Tanzania subsidiaries respectively.*
- *Regional subsidiaries continued to deliver strong growth, led by loan expansion of 17% in DRC, 22% in Rwanda and 61% in Tanzania*
- *Equity Insurance Group sustains strong momentum as it reports a 75% increase in written gross premiums, contributing to a 36% growth in profit before tax.*
- *FY 2025 saw the Group deliver ~Kshs 99.5B (\$771 million USD) cumulatively in social impact and sustainability investment initiatives.*

Nairobi, 18th March 2026: Equity Group Holdings Plc has announced record FY2025 results in Kenya's corporate history, posting a 55% increase in Profit After Tax of KSh75.5 billion, up from KSh48.8 billion. The performance reflects the Group's successful business transformation, diversified revenue growth, enhanced efficiency, and robust regional contributions. The balance sheet expanded by 9% to KSh1.97 trillion (FY2024: KSh1.8 trillion), with customer deposits rising 4% to KSh1.46 trillion (FY2024: KSh1.40 trillion) and net loans increasing 8% to KSh882.5 billion (FY2024: KSh819.2 billion). The Group closed the year with 22.4 million customer accounts, supported by a strong regional distribution and digital ecosystem.

Strong revenue performance saw net interest income grow 17% to KSh 126.9billion, non-funded income rise 7% to Ksh90.8 billion, and total income increase by 12% to Kshs 217.7 billion (FY2024: KSh193.8 billion). Operational efficiency improved significantly, with the cost-to-income ratio falling to 51.0% from 58.2%, driven by continued migration to self-service channels, productivity gains, and tighter cost discipline supported by Group-wide shared services and digital infrastructure. Over 98% of customer transactions were conducted outside branches, with 88.4% processed through digital channels, reflecting continued demand for digital services with increased investment in customer-centric digital infrastructure. Loan loss provisions declined 28%, while NPL coverage strengthened to 67.7%, supported by a reduced cost of risk of 1.7%.

Commenting on the results, Equity Group Managing Director and CEO Dr. James Mwangi said the performance demonstrates the strength of the Group's strategic transformation, driven by diversified revenue streams, improved efficiency and growing contributions from regional subsidiaries: "The 2025 performance reflects the success of our deliberate transformation into a diversified, regional financial services group. We delivered strong profit growth by expanding and deepening our income streams, improving efficiency across the franchise, and strengthening the quality of our balance sheet. Importantly, our regional subsidiaries now contribute about half of our banking profitability, demonstrating the value of our pan-African footprint and the resilience that comes from diversification.

Press Release (continued...)

On the back of this performance, the Directors have recommended a dividend of Kshs 5.75 per share, up from Kshs 4.25 amounting to a payout of Kshs 21.7 billion (2024: Kshs 16 billion), representing a 35.3% growth in dividends.

Equity Bank Kenya Limited (EBKL) reported a 63% rise in profit after tax to KSh39.2 billion (FY2024:KSh24.1 billion), driven by a 28% increase in net interest income and a 37% reduction in interest expense. Shareholders' funds grew 11% to KSh136.2 billion, while returns on assets and equity strengthened to 3.9% from 2.4% and 26.8% from 20.2%, respectively. The performance reinforces EBKL's leadership in supporting enterprise growth, with the Bank having been recognised at the Kenya Bankers Association Sustainable Finance Initiative (KBA SFI) Awards as the Best Bank for MSME Financing contributing 45% of all banks lending to SMEs.

Regional operations accounted for about half of Group profitability in FY2025, underscoring Equity's emergence as a pan-African financial services group. In the DRC, profit after tax rose 58% to KSh24.7 billion, supported by 17% loan growth. Uganda's profit after tax jumped 500% to KSh3.6 billion, while Rwanda posted profit after tax of KSh5.4 billion, with total assets up 5% and the loan book expanding 22%. Tanzania's profit after tax grew 125% to KSh2.7 billion, alongside a 75% increase in shareholders' funds. Overall, subsidiaries contributed 51% of banking profit before tax and 48% of banking profit after tax.

Equity Insurance Group continued its strong expansion, driven by newly acquired life, general, and health underwriting licenses. Gross written premiums rose by 75% to Kshs 9.17 billion, delivering Profit Before Tax growth of 36% to Kshs 2.0 billion, and a 150% rise in insurance revenue to Kshs 3.57 billion. All subsidiaries delivered solid growth: Equity Life Assurance which delivered a Profit Before Tax of KShs 1.77 Billion now serves unique 6.9 million customers with 19.2 million policies issued since inception, Equity General Insurance reported Kshs 1.79 billion in Gross Written Premiums and Kshs 199 million in Profit Before Tax in its first year of operations whilst Equity Health Insurance reported Gross Written Premium of KShs 20 Million and KShs 40 million in Profit Before Tax in its first 4 months of operations.

Africa continues to show strong economic momentum, with 11 of the world's 20 fastest-growing economies in 2025, including South Sudan, Rwanda, and Uganda. A minerals boom is lifting growth in DR Congo, Tanzania, and Uganda, while high gold, copper, and coffee prices – combined with low oil and wheat prices and a weaker US dollar – are supporting East African economies. Although geopolitical risks have risen due to the Iran conflict, the impact is expected to be temporary; oil prices briefly spiked to about \$100 but are projected to ease to the mid-\$60s after a ceasefire, helping stabilize trade and inflation. Global inflation remains contained, though recent rate cuts in the DRC and Kenya may face short-term pressure from higher oil prices.

The Equity Group Foundation (EGF) is driving meaningful social impact across Africa - supporting 1,115 scholars with global university scholarships, including 145 airlifted during the year, training nearly one million entrepreneurs, and enabling over 500,000 MSMEs to access Kshs 401 billion in credit. It has empowered 3.8 million farmers with climate-smart agriculture skills, distributed over half a million clean energy solutions, and planted 44.6 million trees. Through the growing Equity Afya network, now 150 centres strong, 4.6 million patients received affordable, quality healthcare.

Press Release (continued...)

The Foundation is scaling its Innovation and Technology Pillar by training over 600,000 youth in AI, machine learning, and data analytics through partnerships with iamtheCODE, Huawei, and WorldQuant University. With strengthened impact measurement under the global Sustainable Disclosure Impact Data (SDID) framework and recognition through the 2025 Sustainable CSR Award, EGF continues to show how integrated investments in education, enterprise, health, and climate resilience drive inclusive growth.

The Group's strong performance also reflects its intentional focus on anchoring a refreshed corporate culture and strengthening staff productivity to deliver a consistently delightful customer experience. By institutionalizing robust internal controls, elevating performance standards, and embedding disciplined, data-driven execution across all teams, the Group has enhanced operational efficiency, strengthened risk management, and deepened customer-centricity.

These strategic measures, combined with a culture of accountability, agility, and service excellence, continue to position the Group to deliver superior outcomes across all markets.

Equity Bank was named the Best Regional Bank in East Africa and retained its position as Kenya's most valuable brand in 2025, reaffirming the Group's regional leadership and commitment to financial inclusion and socio-economic transformation. Beyond lending, the Group is strengthening market linkages for SMEs by enabling cross-border trade through its regional footprint and integrated digital payments and transaction-banking capabilities; helping businesses access new customers, suppliers and growth opportunities across the region.

Dr. Mwangi added that the Group will continue to execute its 2030 strategy anchored in the Africa Recovery and Resilience Plan (ARRP), leveraging next-generation digital and AI-enabled capabilities to scale impact, deepen inclusion and accelerate growth across the continent: "Our focus is to build a future-ready institution that is scalable, secure and impact-led. Through our Africa Recovery and Resilience Plan, we are investing in next-generation digital and AI-enabled capabilities that enhance customer experience, strengthen risk management and lower the cost-to-serve, while extending access to affordable credit, insurance and investment solutions. As we progress toward our 2030 ambitions, we are evolving beyond traditional banking into a Transformation Finance Institution that mobilizes capital, connects ecosystems and accelerates inclusive, sustainable prosperity across Africa," he said.

Equity Group's 2030 strategy positions the organization for transformative, continent-wide growth. Anchored in the Africa Recovery and Resilience Plan (ARRP), the Group aims to operate in 15 countries and serve 100 million customers by 2030. With strong governance, upgrades include next-generation digital, AI-enabled systems, and the launch of innovative applications supported by a modern go-to-market model. These developments drive more effective service to diverse customer segments while building a culture of client centricity, agility, and innovation. Through blended finance, strategic partnerships, and ecosystem development, Equity is evolving from a traditional bank into a Transformation Finance Institution - mobilizing private capital to drive inclusive, sustainable prosperity across Africa.

ENDS

Macroeconomic and
Operating Environment

The Global Economic Landscape

Resilience in a Dynamic Global Environment

- **Improving Global Economic Growth:** The global economy remains resilient with the US expected to grow by 2.4% in 2026 and China by 4.5% signaling stronger worldwide economic prospects.
- **Elevated geopolitical risks:** Geopolitical risks have been elevated by the Iran conflict, but markets expect the disruption to be temporary, limiting long-term impacts on global activity.
- **Global oil prices on upward trend:** Oil prices have temporarily spiked to around \$100 due to the Iran conflict, but the base case remains that prices will fall back toward the mid-\$60s once a ceasefire is reached, which is positive for trade, reserves and inflation.
- **Global inflation remains generally contained,** supporting recent rate cuts in the DRC and Kenya but higher oil prices will temporarily lift inflation in most markets that EGH operates in.
- **Global equity markets rise** which can fuel economic growth. We estimate world market capitalization rose \$27 trillion in 2025 and \$4 trillion in the first six weeks of 2026. Spillovers to Africa pushed equity markets up by roughly 50% in US dollars in 2025.
- **East African growth drivers:** Regional economies are benefiting from a weaker US dollar, strong metals prices, and improving investor sentiment. However, the temporary spike in oil prices is expected to lift inflation and delay rate cuts until oil eases back toward the \$60 -70 range later in 2026.

Dynamics in EGH Operating Markets

East Africa Remains a Growth Powerhouse

11 of the top 20 fastest growing economies in the world were in Africa in 2025 including South Sudan, Rwanda and Uganda. The 2025 minerals boom is boosting DR Congo, Tanzania and Uganda (re-exports). Low oil and the weak US dollar is benefiting all East Africa Economies.

- **Inflation trends support stability:** Low inflation in Kenya, Uganda, Tanzania with substantial easing in DRC. Strong GDP growth in Rwanda adds to some inflation pressure there. South Sudan's prospects remain dependent on oil exports.
- **Commodity prices A boost for the region:** Gold, copper and coffee prices have been very high, while oil and wheat are low, a useful combination for most EGH economies.
- **Foreign investors flows:** Uganda attracted significant FDI into its oil industry, and bond inflows in 2025. The DRC is receiving high interest for its copper resources. Kenya has nearly \$6bn of deals (IPOs and FDI) announced in December 2025 and January 2026.
- **Renewal of AGOA:** Kenya benefits the most in East Africa. In 2025 it gained a competitive edge over Asia textile producers, as the US only imposed low tariffs (mostly 10%) on East Africa.

Top 20 GDP growth countries in 2025 and 2026 as estimated by IMF WEO
October 2025, via Equity Group Holdings

Dynamics in EGH Operating Markets

Region well-poised to improve average income levels

- Strong per capita GDP growth: East African economies delivered per capita GDP growth rates that out-performed the U.S. in 2025, with projections indicating similar or stronger performance in 2026.
- Most EGH economies are projected to deliver 3%+ per capita GDP growth in 2025–26, outperforming not only the U.S but also major African peers such as Egypt, Nigeria, and South Africa.

Select Africa Eurobond Dynamics

Eurobond Prices

- Global asset allocators are pushing money towards emerging markets and better yielding African Eurobonds in particular. The main risks to this trade are U.S. inflation or a U.S. recession, pushing up high yields spreads and tempting money back to that market.
- **Kenya's** Eurobonds have risen above the highest level seen since early 2022, partly due to slightly lower US treasury yields but mainly due to a global hunt for non-U.S. assets with yield. Yields on the 2032 Eurobond have plunged from 12% in April 2025 to 7% in February 2026, a nearly 50% fall in Kenya's risk premium. Kenya has taken advantage of this by pre-financing debt maturing in 2028.
- **Rwanda's** 2031 Eurobond has also performed well, with the yield now around 7%.
- **Senegal** is today a rare exception among African Eurobonds, with default at least partly priced in.

Largest Economies in Africa

- The top 15 African economies in 2025 as estimated by the IMF in October
- Nigeria still in 4th but expected to overtake Algeria in 2026.
- Kenya in 6th place ahead of Ethiopia, Ghana in 8th, and Angola expected to slip from 7th to 10th in 2026 due to Angolan Kwanza (AOA) weakness
- The latest IMF forecasts put DRC at \$92bn in 2025 (above Tanzania) and \$109bn in 2026.

GDP in \$bn, 2025, latest IMF (Oct 2025) estimates

Interest Payments as a Percentage of Revenues

Governments need to be mindful of their interest burden, low or falling inflation helps

- **Strong African Equity Markets** especially in Egypt and Kenya, posted some of the strongest performances in 2025, despite elevated default risk and heavy debt-service burdens. A global rotation into emerging markets pushed African equities up nearly 50% in USD terms.
- **High interest burdens persist** - Interest payments remain high at 30 - 32% of revenues in Kenya and 27 - 30% in Uganda, with IMF forecasts showing little improvement through 2026-28. Both economies rely on sustained GDP growth and future declines in interest rates to stabilize debt ratios.
- **Inflation pressures reduce scope for rate cuts** - Although inflation was low earlier in the year, the oil price shock from the Iran conflict is expected to raise inflation in the coming months. Kenya is likely to pause rate cuts, and Uganda faces similar constraints, delaying the easing of debt-service burdens.

Equity Investment Bank

Market Opportunity and Strategic Alignment

Universal banking integration delivering holistic advisory across personal, business and legacy

1

Severe market development deficit: Africa's capital markets hold just USD 1.7Tn in financial assets, 1.4% of the global total, despite the continent representing 17% of the world's population. Pension assets at 15% of GDP and mutual fund penetration at 5% of GDP lag global averages by 4 – 12 times. World Bank 2023

4

Unprecedented demographic dividend: Median age of 19.7 years and a projected population of 2.4B by 2050 make Sub-Saharan Africa the world's largest emerging investor base — with a working-age population growing at %2.7 annually. UN Population Division

2

Massive market access gap: Only %3 of Africa's population participates in formal capital markets. Investment minimums averaging %250 of monthly income, combined with limited distribution, systematically exclude most savers from wealth-building instruments. African Securities Exchanges Association 2023

5

Accelerating middle-class growth: USD 2.1Tn in annual middle-class consumer spending by 2030. Household investable assets projected to reach USD 1.3T. Demand for financial products growing %15 annually — far outpacing existing supply. AFDB 2023

3

Compounding structural barriers: T+5 settlement (vs. T+2 globally), 54 separate regulatory frameworks, %73 higher transaction costs and persistent currency volatility compound to create systemic barriers — suppressing market depth and foreign investor participation. African Securities Exchanges Association

6

Digital financial revolution: 495M digital payment users by 2025, USD 701Bn in mobile money transactions (2021) and %62 projected smartphone penetration create the digital rails for democratised, scalable capital market access. GSMA 2023

EIB is building the infrastructure that will enable Africa's 2.4 billion people to participate in and benefit from economic growth. This is foundational to closing the 3% wealth gap.

Sustainable Development Impact Disclosure (SDID)

From addressing Sustainable Development Goals (SDGs) with intentionality, measurability and ambition to prioritizing the most acute developmental gaps

The Process

The Group is planning to extend SDID reporting to all subsidiaries.

- Equity Bank (Kenya) Ltd launched the first voluntary impact disclosure, developed in partnership with J.P. Morgan.
- The SDID complements the Group's Sustainability and Integrated Reports
- The Report aligns financial performance with measurable SDG outcomes
- Equity's SDID reporting aims to:
 - Scale blended finance partnerships
 - Strengthen data transparency and SDG impact traceability
 - Monitor and Report targets

Scan the QR Code to access the full SDID report.

EQUITY GROUP HOLDINGS PLC RECOGNIZED AS A SUPERBRAND IN EAST AFRICA

Equity Group Managing Director and CEO, Dr. James Mwangi (Right) receives the certificate of recognition from Superbrands East Africa Project Director Jawad Jaffer (Left).

Equity Group Holdings Plc has been recognized as a Superbrand in East Africa (2024-2026), a distinction that affirms the Group's commitment to quality, reliability, and excellence in the financial services sector. Equity was the first bank in Kenya to receive this recognition in 2007 and the only bank to have received it four times in East Africa. Equity's inclusion in Superbrands East Africa Volume 9 comes at a pivotal time as the Bank continues to strengthen its presence across East and Central Africa as a regional brand serving the unique needs of its customers across diverse territories.

FREEDOM OF THE CITY OF LONDON

Dr. James Mwangi, Equity Group Holdings Managing Director and CEO with Lord Jonathan Marland, Chair of the Commonwealth Enterprise and Investment Council (right) and Lord Hugo Swire, Deputy Chair of the Commonwealth Enterprise and Investment Council (left). Dr. Mwangi was conferred the Freedom of the City of London, a prestigious honor recognizing his exceptional work in promoting inclusivity and creating equitable communities. The award dates back to the 12th century and has been conferred upon only a select couple of hundred individuals like Nelson Mandela, Dwight D. Eisenhower, Benjamin Franklin, Winston Churchill, Margaret Thatcher, Lee Kuan Yew and Archbishop Desmond Tutu.

UNHCR VISIONARY AWARD

Equity Group Foundation Executive Chairman Dr. James Mwangi received the United Nations High Commissioner for Refugees, UNHCR Visionary Award for his bold leadership and pioneering efforts in financial inclusion for displaced communities across Africa.

Equity Group Holdings Plc Investor Briefing

FY 2025 PERFORMANCE

Proparco grants €1 million technical assistance to Equity Group Foundation to help Kenyan smallholder farmers transition to Climate-Smart Agriculture

Proparco and Equity Group signed an agreement, granting technical assistance of one million euros to Equity Group Foundation (EGF) for the implementation of its high-impact project, "Climate Resilient Agri-Food Systems (CRAFS)."

This partnership with a long-standing client, Equity Group, aims to support small Kenyan farmers in the adoption of sustainable practices. The signing ceremony took place in, March 18, 2025, in Nairobi, in the presence of H.E. Arnaud Suquet, French Ambassador to Kenya, Jean Guyonnet-Dupérat, Proparco's Regional Director for East Africa and Dr. James Mwangi, Equity Group Managing Director and CEO.

From left to right: Jean Guyonnet-Dupérat, Proparco's Regional Director for East Africa, H.E. Arnaud Suquet, French Ambassador to Kenya, and Dr. James Mwangi, Equity Group Managing Director and CEO during the event.

The UN General Assembly President Visits Equity to Discuss Youth Innovation and Digital Technology

His Excellency Philemon Yang, the President of the United Nations General Assembly (UNGA), visited Equity for high-level discussions centered on youth innovation, digital technology, and sustainable development. During the visit, he was hosted by Equity Group's Chairman Professor Isaac Macharia, alongside other Board members and senior managers.

From 2nd Left – Right: Professor Isaac Macharia, Equity Group Chairman, H.E Philemon Yang, President of the United Nations General Assembly, Ms. Zainab Hawa Bangura, Director General, United Nations Nairobi and Eng. John Tanui, MBS: Principal Secretary in the Ministry of Information, Communications and the Digital Economy in charge of the State Department for ICT and the Digital Economy, follow a presentation by an Equity Leaders Program scholar (Left) on

one of their innovations, during a visit to Equity Group.

John Tanui, MBS: Principal Secretary in the Ministry of Information, Communications and the Digital Economy in charge of the State Department for ICT and the Digital Economy (front left), some of the Equity leadership team led by Equity Group Chairman, Professor Isaac Macharia (front 2nd right) and a section of the Equity Leaders Program scholars during a visit to Equity Group.

Macroeconomic Environment Indicators & Trends

Iran's retaliation against Israel/US military actions created an unexpected geopolitical escalation that rattled global markets and triggered immediate concerns about oil supply security.

Global Impacts

- **Oil prices surged sharply** - The conflict pushed global oil prices up by 42% in less than two weeks (27 Feb - 9 March), as traders priced in the risk of disrupted Middle East supply routes.
- **Risk of supply disruption and extreme scenarios** - A closure of the Strait of Hormuz which moves 16 million barrels/day, would create a severe global shock. This would force oil above \$218 per barrel and likely trigger a global recession more severe than the 2020 contraction.
- **Monetary policy expectations shifted** - With oil driving inflation fears higher, markets reduced expectations of US monetary easing. Only one Federal Reserve rate cut remained fully priced in for 2026.
- **Global economic outlook downgraded** - The geopolitical tension shifted the macroeconomic environment from broadly positive to neutral, driven mainly by energy-related risks.

Continental Impacts - Africa

- **African financial markets experienced immediate pressure** - Currencies and equities in several African countries weakened within days. For example, Egypt's currency depreciated by 4% and African equity markets fell 8 - 10% in USD terms, showing heightened risk aversion to emerging and frontier markets.
- **Higher oil prices strained inflation and current accounts** - Most African economies - being oil importers - felt the pressure through rising fuel costs. The spike raised the likelihood of elevated inflation, delayed interest-rate cuts, weaker currencies and wider current-account deficits driven directly by the surge in international oil prices.

Regional Implications - East Africa

- **East African currencies reacted unevenly** - Among East African markets, the Ugandan shilling weakened by about 4%, making it the most impacted in the region. Other currencies held more stable, but broader investor sentiment toward East Africa deteriorated in the short term.
- **Borrowing costs and capital flows faced temporary setbacks** - Bond markets, especially long-dated securities, experienced sell-offs as investors became more cautious. East African Eurobonds weakened, though the expectation remained that they would regain value once geopolitical tensions eased.
- **Anticipated increases in inflation due to oil** - Regional inflation was projected to rise as higher oil prices filtered into fuel and transport costs. This risked pausing or reversing interest rate-cutting cycles in Kenya, Uganda, Rwanda, and Tanzania.

Kenya Country Economic Update

Stable Fundamentals in 2026

- **Economic growth:** 2025 Q3 GDP up 4.9% boosted by construction recovery. 2026 growth expected at around 5%.
- **Inflation:** YoY inflation was 4.5% YoY in December (4.4% in January 2026). Annual average inflation for 2025 was 4.1% down from 4.6% in 2024, below the 5.0% mid-point of the 2.5-7.5% target range. FX stability and low oil is helping food prices remain a risk.
- **Stable KES:** KES remained steady at 129/\$ but weakened against the euro and pound. FX reserves as defined by the IMF rose 74% (\$5bn) from December 2023 to December 2025, as the CBK bought FX in the market. Without that intervention, we think the KES would be 110-120/\$.
- **Monetary policy:** CBR cut to 8.75% in February 2025, taking cumulative cuts since August 2024 to 425bps. We expect 75-125bps of cuts in 2026.
- **KESONIA:** The rate is pegged at +/- 50 bps of CBR and took effect on 1st of December 2025 for new loans. The effective date for existing loans 28th of February 2026.
- **Infrastructure fund:** Cabinet approved a Sh5trn infrastructure fund (\$38bn) in December, which together with the sovereign wealth fund would fund development spending and reduce reliance on debt. Key projects on the pipeline include dualling of Mau-Summit-Rironi Road SGR phase 2B project
- **Fiscal deficit:** Fiscal deficit to widen from 4.7% of GDP in FY2025/26 original budget to 5.3% of GDP in FY2026/27.

World Bank, IMF and AGOA talks

- **World Bank negotiations :** World Bank issued fresh conditions for the release of \$750m including implementation of Treasury single account.
- **Kenya-IMF relations.** IMF mission due at end February 2026 to discuss a possible financing deal. High FX reserves suggest a deal may only come after 2027 elections.
- **AGOA-** Duty free access to the USA market for apparels extended until end-2026.

DRC Country Economic Update

Resilience Amid Uncertainty

Resilient growth: GDP growth is expected to decelerate slightly from 5.6% in 2025 to 5.3% in 2026, based on the latest IMF report.

Big drop in inflation: Year-on-year inflation fell from 11.7% at end-2024 to 2.3% in December 2025, well below the BCC's 7% target.

Strengthening CDF: CDF registered significant appreciation in the 2nd half of 2025 with gains of about 22% compared with Jan 2025.

Monetary policy: The BCC cut the policy rate from 25% to 17.5% (750 bps) in October 2025 and to 15% in January 2026. This reflects sustained disinflation, improved exchange rate stability, and stronger external buffers.

Commodity prices: Copper and cobalt prices rose sharply in 2025 setting record nominal highs. Cobalt export quotas extended for Q1 2026.

East DRC: A US-brokered peace deal between DRC and Rwanda has raised diplomatic momentum, but sporadic fighting and insecurity persist on the ground, highlighting fragile implementation of the agreement

Humanitarian challenges: Renewed hostilities in eastern DRC, ongoing health crises, and climate hazards are worsening the humanitarian situation, compounded by funding cuts to WFP and UNHCR that limit social and development support.

Uganda Country Economic Update

Post-Election Stability and Oil Momentum Set the Stage for Strong Growth in 2026

- **Strong macroeconomic fundamentals:** Uganda enters 2026 with robust growth, low Inflation, a stable currency and improved FX reserves.
- **Economic growth:** Uganda's GDP rose an estimated 6.3% in 2025 and is projected to accelerate to 6.5 - 7.0% in 2026, paving the way for double-digit expansion in 2027 as oil exports come onstream, before settling into a strong and sustainable 6 - 7% in the post-oil era.
- **Inflation:** YoY inflation hit 3.1% in December (3.2% in January 2026), with 2025 averaging 3.6% up from 3.3% in 2024. Inflation is set to stay comfortably within the 5% BoU target, supported by stable FX, favorable weather, and lower oil prices.
- **Monetary policy:** Bank of Uganda maintained the CBR at 9.75% in 2025 and is expected to maintain neutral - slightly accommodative stance in 2026.
- **UGX held strong in 2025:** Set to stay stable in 2026 on export gains and robust capital inflows.
- **Foreign exchange reserves** rebounded strongly in 2025, climbing to about US\$6.0bn in 2025 from US\$3.3bn the year before, supported by a favorable external environment and robust portfolio inflows, with a broadly positive outlook for 2026.

Uganda Country Economic Update

Post-Election Stability and Oil Momentum Set the Stage for Strong Growth in 2026

- **Strong macroeconomic fundamentals:** Uganda enters 2026 with robust growth, low Inflation, a stable currency and improved FX reserves.
- **Economic growth:** Uganda's GDP rose an estimated 6.3% in 2025 and is projected to accelerate to 6.5 - 7.0% in 2026, paving the way for double-digit expansion in 2027 as oil exports come onstream, before settling into a strong and sustainable 6 - 7% in the post-oil era.
- **Inflation:** YoY inflation hit 3.1% in December (3.2% in January 2026), with 2025 averaging 3.6% up from 3.3% in 2024. Inflation is set to stay comfortably within the 5% BoU target, supported by stable FX, favorable weather, and lower oil prices.
- **Monetary policy:** Bank of Uganda maintained the CBR at 9.75% in 2025 and is expected to maintain neutral - slightly accommodative stance in 2026.
- **UGX held strong in 2025:** Set to stay stable in 2026 on export gains and robust capital inflows.
- **Foreign exchange reserves** rebounded strongly in 2025, climbing to about US\$6.0bn in 2025 from US\$3.3bn the year before, supported by a favorable external environment and robust portfolio inflows, with a broadly positive outlook for 2026.

Rwanda Country Economic Update

Fast Growth and Important Anchor

- **Robust Growth:** Rwanda's economy expanded by 11.8% YoY in Q3-2025, accelerating sharply from 7.8% in Q2-2025 and 6.5% in Q1-2025. This represents one of the strongest quarterly growth outcomes in recent years, significantly outperforming the government's medium-term growth benchmark.
- **Inflation:** Rwanda's headline urban inflation accelerated to 8.9% YoY in January 2026, from 8% in December 2025, signalling renewed price pressures after the mid-year moderation.
- **RWF:** The pace of RWF depreciation against the US dollar has moderated, with exchange rate pressures expected to remain manageable under the managed float framework.
- **Monetary Policy:** The National Bank of Rwanda raised the CBR by 50bps to 7.25% in February 2026, marking its first hike since August 2025.
- **GDP Rebased in September:** Raised the economy's size to US\$14.8 bn (RWF21.5tn) from US\$12.6bn (RWF 18.3tn).

Tanzania Country Economic Update

Strong Macroeconomic Fundamentals

- **Economic growth:** 6.4% in Q3 2025; full-year 2025 is estimated at around 6%, and similar in 2026.
- **Inflation:** Best-in-class regionally, averaging 3.3% in 2025; 3.6% in December 2025 (from 3.4% in November).
- **Monetary policy:** Accommodative, with the CBR held at 5.75% in Q1 2026, supporting growth amid stable inflation.
- **Exchange rate:** TZS stable, with a 1% appreciation against the USD by Q4 2025. Potential for appreciation in 2026 driven by gold.
- **Asset quality:** NPL ratio at 3.1% in Q4 2025, well below the 5% tolerance level.
- **Fixed income:** Attractive real returns, with 2–20-year yields in a 10–12% range in December 2025. Lending rates around 15%.
- **Exports:** Goods exports rose 12% from \$9bn in 2024 to \$10bn in 2025, driven by gold at USD \$4.7 bn up 37%.
- **Investment reforms:** Establishment of TISEZA in 2025, strengthening the investment framework.
- **International tourist** arrivals increased to 2.3m in 2025 from 2.1m in 2024.

South Sudan Country Economic Update

Lost Time

- **Uncertainty on GDP growth:** The IMF (October 2025) estimates GDP growth was +24% in 2025, the World Bank (Jan 2026) estimates it was -24% (presumably for the fiscal year ending June 2025). Both forecast growth in 2026, at 22% (IMF) or 49% (World Bank).
- **Oil production disruption:** Conflict continues to disrupt oil exports, with reports at end-2025 that South Sudan needed approval from both sides of Sudan's civil war to allow its oil exports out of the country. Exports dropped in December and slumped in January 2026.
- **Domestic fighting:** Rebels are in conflict with the Juba government.
- **Inflation:** Official data was last released for May 2026. Based on our exchange rate estimates, we think inflation fell from a peak 331% in January to 37% by December 2025. An upsurge is likely if oil exports remain low.
- **Exchange rate:** The currency stabilised at around 4,500/\$ from April to December 2025, the parallel rate strengthened slightly by end-2025 to 5,717/\$, a 26% premium vs a recent peak of 32% in June 2026. Renewed weakness is likely if oil exports remain low.
- **Growing humanitarian crisis:** Hunger is at high levels in South Sudan, alongside the country's severe cholera outbreak.
- **South Sudan remains in default:** Afreximbank has sued and won a court case to be repaid over \$0.5bn in principal and interest. The government has budgeted \$0.2bn for debt service this fiscal year 2025/26.
- **U.N report on diversion of oil revenue:** The U.N Human Rights Council has indicated systemic misappropriation of significant amounts of oil revenue in South Sudan which is absorbed by a select elite.
