A. Company-Level Performance

Centum operates as an investment holding company whose strategy is to identify compelling opportunities, support their growth, and monetize the value created through annuity income and eventual exits. Annuity income is generated through dividends, interest, and the repayment of shareholder loans advanced to portfolio companies, with capital gains realized on partial or full exits.

For half year ended 30 September 2026, the Company delivered a total return of Kes 472 million, compared to Kes 444 million in the prior period. Operating expenses increased by 5%, broadly in line with inflation. Finance costs declined by 64%, reflecting the ongoing deleveraging programme that reduced Company borrowings from Kes 690 million in March 2025 to Kes 605 million in September 2025. Consequently, gearing reduced to 1.3%, down from 1.5% as at 31 March 2025. Other comprehensive income rose to Kes 99 million, from Kes 14 million in the prior period, driven by improved performance in some subsidiaries.

The Company's Net Asset Value per share increased by 3%, to Kes 68.75 from Kes 66.93 as at 31 March 2025, primarily due to a reduction in liabilities over the half-year.

Company Balance Sheet Highlights

The Company recorded a 1% growth in Net Asset Value (NAV) as at September 2025 compared to March 2025. Total assets declined marginally by 1%, to Kes 49.9 billion from Kes 50.6 billion, driven by repayments of shareholder loan during the period. In line with our valuation policy, the private equity portfolio was not revalued as at half year. Total liabilities reduced by 20% with the repayment of debt, and in line with our deleveraging strategy

Company Cash Flows and Debt

The Company generated Kes 703 million in net operating cash flows during the half-year period, driven by annuity income and the repayment of shareholder loans. These inflows were applied primarily toward debt reduction and dividend payments.

Consistent with our deleveraging strategy, Company borrowings reduced from Kes 690 million in March 2025 to Kes 605 million in September 2025. Subsequent repayments after the reporting date have further reduced the outstanding borrowings to Kes 440 million.

B. Consolidated Performance

Under IFRS 10, Centum consolidates the full line-by-line performance of all subsidiaries over which it exercises control, regardless of ownership percentage. The Group results therefore reflect the combined performance of subsidiaries, as well as Centum's share of results from associates and joint ventures under the equity method. Centum's stake in Longhorn Publishers (trading segment), TRDL and TRIFIC SEZ was, 60%, 58% and 80.5% respectively as at reporting date.

For the period, the Group recorded a 6% improvement in profit after tax, supported by stronger performance in several operating businesses and the recognition of a higher deferred tax credit.

Segment highlights

I. Two Rivers Development Limited (TRDL)

The loss contribution for the period is primarily driven by performance of the power and water utility subsidiaries, which remain below the utilisation levels required to reach break-even. As occupancy across the Two Rivers precinct increases, utility uptake and financial performance are expected to improve.

II. Centum Real Estate Ltd (Centum RE)

Centum RE's performance reflects a timing mismatch between revenue and expenses arising from IFRS requirements.

- **Residential sales – IFRS 15**
 Revenue is recognised only upon completion and full payment for units. Units recognised in HY 2026 relate mainly to earlier projects with lower historical gross margins. The current generation of sales—which have significantly higher margins—will be recognised in subsequent periods when completion and payment milestones are met.
- **Expense recognition**
 All operating expenses, including sales and marketing costs for ongoing projects, must be expensed immediately and cannot be capitalised under IFRS. This results in a temporary revenue–expense mismatch during active development phases.
- **Land sales – IFRS revaluation rules**
 Revenue on land is recognised only when full payment has been received. The cost of land sold must be measured at the most recent annual revaluation amount, which typically aligns with market pricing and the value of signed sale contracts. As a result, the IFRS-recognised profit on land sales is modest, even where the underlying cash margins are strong.

III. Two Rivers International Finance & Innovation Centre (TRIFIC SEZ)

The SEZ results primarily reflect finance costs on the development loan for the first office tower, as well as set-up and establishment costs, all of which have been expensed upfront under IFRS. These costs will be recovered upon the exit of the first tower. Revenue recognised in the period relates solely to rental income from the fully occupied tower.

The SEZ company is at an advanced stage of concluding the sale of this tower to a USD-denominated Income REIT. Completion of this transaction will, (i) settle the development loan; (ii) recover the set-up costs; (iii) eliminate ongoing finance charges; and (iv) release capital for development of the next tower.

IV. Deferred Tax Movements

The higher income tax credit is driven by the recognition of deferred tax assets in Longhorn Publishers Plc and Two Rivers Land Co. (SEZ) Ltd. In the prior period, the Group incurred a one-off capital gains tax charge following the increase in the CGT rate from 5% to 15% affecting Centum Real Estate.

V. Other Comprehensive Income (OCI)

Other comprehensive income net of tax was Kes 214 million, compared to Kes 165 million in the prior period, mainly due to unrealised foreign currency translation gains on assets denominated in Uganda Shillings.

Capital Allocation and Shareholder Returns

Under our ongoing share buyback program initiated in October 2024, a total of 150,800 shares have been repurchased by June 2025 at an offer price of Kes 9.51 per share, representing 0.23% of the buyback target. Since 19 December 2024, our share price has consistently traded above the buyback threshold of Kes 9.51, reflecting the success of the initiative.

The Board does not recommend payment of an interim dividend.

Outlook

In the second half of FY2026, our focus remains on supporting our portfolio companies to enhance their valuations, strengthen cash generation, and increase distributions back to the Company. As an investment holding company, our returns are driven by the cashflows we receive from our investments. Accordingly, investors should expect periodic mismatches between IFRS-reported consolidated earnings and the timing of cash inflows, especially in businesses where revenue recognition is linked to project completion or exit events.

We have made significant strategic progress in the first half, which lays a strong foundation for continued value creation:

- Successful launch of the Vipingo Special Economic Zone, a joint venture between Centum and ARISE LLP. This SEZ will be a major future driver of profitability and will stimulate demand and value uplift across the wider Vipingo estate.
- A robust pipeline of ongoing land and unit sales in Vipingo, which—while not immediately driving IFRS profit due to revaluation accounting—will generate meaningful cash flows, enabling us to monetize value created over several years.
- Full occupancy of the TRIFIC North Tower, positioning us to seed the asset into the TRIFIC USD Income REIT, the first USD-denominated I-REIT in the region. This will unlock capital, settle development facilities, and support the development of the next tower.
- Support to Centum Real Estate (Centum RE) in securing substantial third-party financing lines for its projects. These facilities strengthen Centum RE's balance sheet, accelerate project delivery timelines, and enhance the pace at which cash returns can flow back to the Company.

Across the Group, we remain committed to disciplined capital allocation, continued deleveraging, strengthening the resilience of our portfolio companies, and unlocking value through carefully timed monetization events. This approach underpins the delivery of sustainable long-term returns to shareholders.
