Business Model

- In the Quoted Private Equity (QPE) business line, we leverage on our private equity expertise to identify, invest and create value in quoted companies that exhibit private-equity-like traits:
 - Illiquid
 - Under-researched
 - Significant growth potential (Value creation potential)
 - Available large stake
- Target deal size USD2-20 million
- Our second mandate is to provide liquidity to the overall portfolio, which largely constitutes of illiquid alternative assets. In the process of searching for typical "QPE" deals, we come across highly liquid marketable securities with attractive valuations, which we invest in to enhance liquidity of the overall portfolio.
- Our chosen scope is Sub-Saharan Africa (SSA)
