Powering Uganda

# HI 2023

## Results Presentation

# Overview

1. Macroeconomic Update

2. Sector Update

3. Operational Performance

4. Financial Overview

5. Key Focus Areas

# Uganda Economic Update

## Macros in brief

CBR lowered to 9.5% from 10% (since Oct 22)

Continued improvement in the level of economic activity, CIEA of 159.54 in June, up by 1.5% in May.

Inflation decreased to 3.9%, below the 5% medium term target. Downward trend expected to continue.

UGX has lost only 0.5% against the USD year to date. Exchange rate is expected to remain stable

Estimated annual growth of 5.3%, economy resilient and recovering well  
GDP drivers: services, industry and agriculture.

# Sector Updates

Commissioning and testing Karuma Hydro Power Plant ongoing.

Consolidation of Government of Uganda agencies postponed to 2025

World Bank electricity scale-up project (targeting 1 million connections)

Reduction of connection costs & implementation of Uganda Development Bank funded connection program.

# Safety Report

***We recorded 7 non attributable fatalities related to network interference, power theft and unauthorized operations.***

# Safety

Fire Marshall Training

Safety Award

Wash lines

School Safety Club

# Growing Electricity Demand: +8.3%

- Increase in sales driven by increase in economic activity
- Driven by reduction in Energy Not Served (ENS), Energy Loss reduction to 16.7%, consumption growth and new connections

# Electricity Sales

## Consumption per Customer Class

| Customer Category        | HI 2023 (GWh)  | HI 2022 (GWh)  | Growth %    |
|--------------------------|----------------|----------------|-------------|
| Domestic                 | 431.2          | 401.0          | 7.5%        |
| Commercial               | 223.5          | 205.1          | 9.0%        |
| Street Lighting          | 1.2            | 1.0            | 25.9%       |
| Industrial – Medium      | 288.2          | 264.1          | 9.1%        |
| Industrial - Large       | 567.6          | 508.6          | 11.6%       |
| Industrial – Extra Large | 519.5          | 495.8          | 4.8%        |
| <b>Total</b>             | <b>2,031.3</b> | <b>1,875.4</b> | <b>8.3%</b> |

## % Share of Electricity Sales

# Revenue Composition

## Revenue per Customer Class

| Customer Category        | HI 2023<br>(US\$ Bn) | HI 2022<br>(US\$ Bn) | Growth<br>(%) | No.              |
|--------------------------|----------------------|----------------------|---------------|------------------|
| Domestic                 | 297.8                | 261.1                | 14.1%         | 1,734,882        |
| Commercial               | 140.6                | 123.0                | 14.3%         | 90,725           |
| Street Lighting          | 0.5                  | 0.4                  | 25.0%         | 302              |
| Industrial – Medium      | 156.6                | 140.5                | 11.5%         | 3349             |
| Industrial - Large       | 239                  | 196.5                | 21.6%         | 666              |
| Industrial – Extra Large | 177.3                | 158.3                | 12.0%         | 50               |
| <b>Total</b>             | <b>1,011.7</b>       | <b>879.7</b>         | <b>15.0%</b>  | <b>1,757,563</b> |

- Revenue from electricity sales increased by 15% on account of volume growth of 8.3%.

## % Share of Revenue

# Energy Losses

## Improved Energy Loss Performance in 2022

- Loss-reduction activities resumed
- CSR and community partnerships to address losses and safety records in low-income areas.
- Reduced investments and growing demand have impacted technical losses

# Cash Collections

- Revenue collection rate was 98.9%.
- Average collection rate of 99.6% over the years
- Lag in collections from government in HI which are now being cleared.

# Customer Connections

## Customer Numbers

- 72k new connections made in 2023
- Supported by customer funded connections, hybrid connections and other funded projects

## Prepaid vs Postpaid % of Total Revenue

- 33.2% of revenues attributed to prepaid customers.

# Drive to Cost-Efficiency

## Operating Expenses

- Opex reduced by 6% due to operating efficiencies, technology uptake and optimized supply chains.
- The reduction in global and country inflation contained cost escalations during the period.

## Opex per KWh

- Opex per KWh sold reduced by 9.8% while Opex per customer reduced by 10%

# Financial Overview (\$m)

| Income Statement          | HI 2023     | HI 2022     | %ch           |
|---------------------------|-------------|-------------|---------------|
| Revenue                   | 289.0       | 249.4       | 15.9%         |
| Cost of Sales             | (193.4)     | (172.0)     | 12.4%         |
| <b>Gross Profit</b>       | <b>95.6</b> | <b>77.4</b> | <b>23.5%</b>  |
| Operating Expenses        | (30.1)      | (32.0)      | -5.9%         |
| EBITDA                    | 65.6        | 45.3        | 44.8%         |
| Amortization              | 56.5        | 21.8        | 158.7%        |
| Finance Costs (ex. lease) | (6.9)       | (4.9)       | 40.8%         |
| PBT                       | 3.6         | 29.7        | -87.9%        |
| <b>Profit After Tax</b>   | <b>2.6</b>  | <b>21.8</b> | <b>-88.1%</b> |
| Financial Position at     | HI 2023     | FY 2022     | %ch           |
| Total Assets              | 656.8       | 691.4       | -5.0%         |
| Shareholders Equity       | 246.1       | 271.6       | -9.4%         |
| Net Debt                  | <b>20.4</b> | <b>71.2</b> | <b>-72%</b>   |
| Operating cashflow        | 59.4        | 52.1        | 14.0%         |

- Revenue increased to \$289m due to growth in electricity sales and underlying pricing.
- Umeme Gross Margin increased to 33.1% vs 31% in HI 2022.
- Profit after tax reduced to \$2.6 m compared to \$21.8 m due to recognition of a higher amortization charge.
- Net debt reduced 72% from FY2022 close.

# Financial Overview (US\$ bn)

| PBT                          | 16.7           | 92.8           | -82.0%        |
| <b>Profit After Tax</b>      | <b>13.2</b>    | <b>64.4</b>    | <b>-79.5%</b> |
| <b>Financial Position at</b> |                |                |               |
|                              | <b>HI 2023</b> | <b>FY 2022</b> |               |
| Total Assets                 | 2411.8         | 2,571.1        | -6.2%         |
| Shareholders Equity          | 903.6          | 1010.0         | -10.5%        |
| <b>Net Debt</b>              | <b>74</b>      | <b>268.4</b>   | <b>-72%</b>   |
| Operating cashflow           | 350.0          | 315.0          | 11.1%         |

- Revenue increased by 19.9% to US\$ 1,076 billion compared to US\$ 897 billion in 2022. The growth is attributed to growth in electricity sales and underlying pricing.
- Umeme Gross Margin increased to 33.1% vs 31% in HI 2022.
- Profit after tax reduced to US\$ 13.2 billion compared to US\$ 64.4 billion due to recognition of a higher amortization charge.
- Net debt reduced by 72% from FY2022 close

# Free Cash Flow

## Free Cash Flow (USD m)

- Free Cash Flow increased 34% y/y
- Dividend payments to be aligned to cash generation
- Interim dividend payment in February 2024 following closure of long-term debt facilities in Dec 2023.  
Proposed interim dividend Ushs 24 per share

# 2023 H2 Focus Areas

## Service

Focus on excellent service delivery through automation, responsiveness, reliability of supply and consumer awareness

## Connections

- Connect more customers through various financing schemes

## Regulatory Targets

- Losses
- Collections
- Cost efficiency
- S- Factor

## People & Institutional Capacity

- Staff productivity
- Recruitment of frontline technical staff
- Training
- Optimize technology and processes

# Guidance

## Leverage

Long-term debt to be fully repaid at 31st Dec 2023.

## Capital Expenditure

Optimizing Capex focused on growth, reliability and efficiency projects.

## Shareholder Returns

Maximize free cash flow for shareholder distributions

Recovery of the Buyout amount at the natural end of the concession.

# Question & Answer
