Results for the six months ended 31st January 2015

The Board of Directors of Carbacid Investments Ltd are pleased to announce its unaudited half year results for the six months ended 31st January 2015.

Turnover in the first 6 months of the year had declined by 15% due to lower demand particularly in the export regions. The exceptional demand for carbon dioxide experienced during the same period last year in the Central and Eastern Africa markets has eased.

Increased operating costs and the levying of new higher mining royalties adversely affected margins, resulting in a reduced operating profit. These additional costs have been absorbed by the Company and have not been passed to customers by price increases.

Investment income has been higher than in the corresponding period of the previous year and consequently the overall net profit after tax is 6% lower than that of the same period last year.

Dividends

The Directors have reviewed the dividend policy particularly in light of logistics and costs of declaring two dividends in a year and in line with the practice adopted by many other listed companies, and resolved that henceforth dividends will be paid as declared at the Annual General Meeting.

By Order of the Board,

N P Kothari,

Secretary,

4th March 2015
