Results for the six months ended 31 January 2025

The Board of Directors of Carbacid Investments plc is pleased to announce the unaudited half year results for the six months ended 31 January 2025.

Trading turnover for the 6 months declined by 13% largely attributed to the stronger shilling versus the US\$, given that a major part of the business is in export markets. There was also softer demand for carbon dioxide in various markets in this period. Gross margin improved due to reduced input costs, savings from solar installation and other focused cost saving initiatives. Administration cost increased by 7% driven by inflation and increased marketing costs to secure existing and additional business. Increased borrowing to finance the plant expansion and higher interest rates have also contributed to the overall cost increases.

There was a gain on revaluation of equity investments due to recovery of the NSE market leading to better stocks valuation. Strengthening of the Tanzania shilling also contributed to a higher value in DSE stocks.

Other investments in the bonds, deposits and money market portfolios gave a stable return compared to prior year. Overall Group Profit after Tax decreased by 10% compared to the same period last year due to exchange rate impact on revenue.

The US dollar shortages in some regional markets continue to impact demand negatively. The Board continues to look at options to cushion the business and recover revenue.

Dividend

A final dividend will be considered based on full year results.

By Order of the Board,

Conrad Nyukuri,
Secretary,

26-Feb-25
